Web 3-Weex Exchange AI Data Dashboard Report

- Use Anti-Gravity to access Gemini and other large language models to track industry trends for Wix.

The process involves:

1. Generating an industry hot topic mind map for the past week
2. Creating a clear, traceable, and reliable ranking of topic priorities (one that is easy to understand at a glance)

Viral Videos Driving Organic Traffic

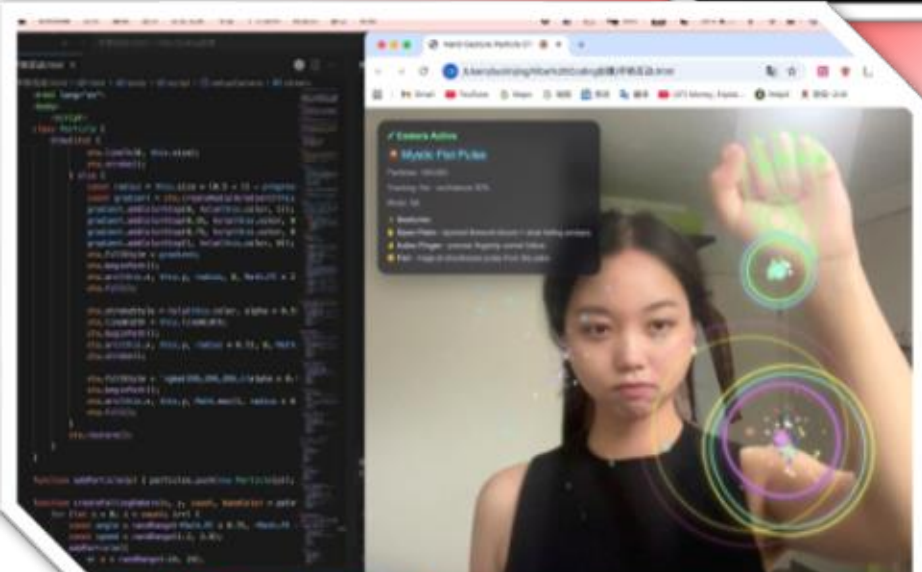

- Created a web demo video showcasing gesture-based interactions for an AI product.

Without any paid promotion, relying solely on the video platform's organic traffic, the video achieved 91,000 views on Threads alone within three days, garnered over 2,000 likes, and saw both reposts and shares exceed 100.

Overseas Social Media Linktree

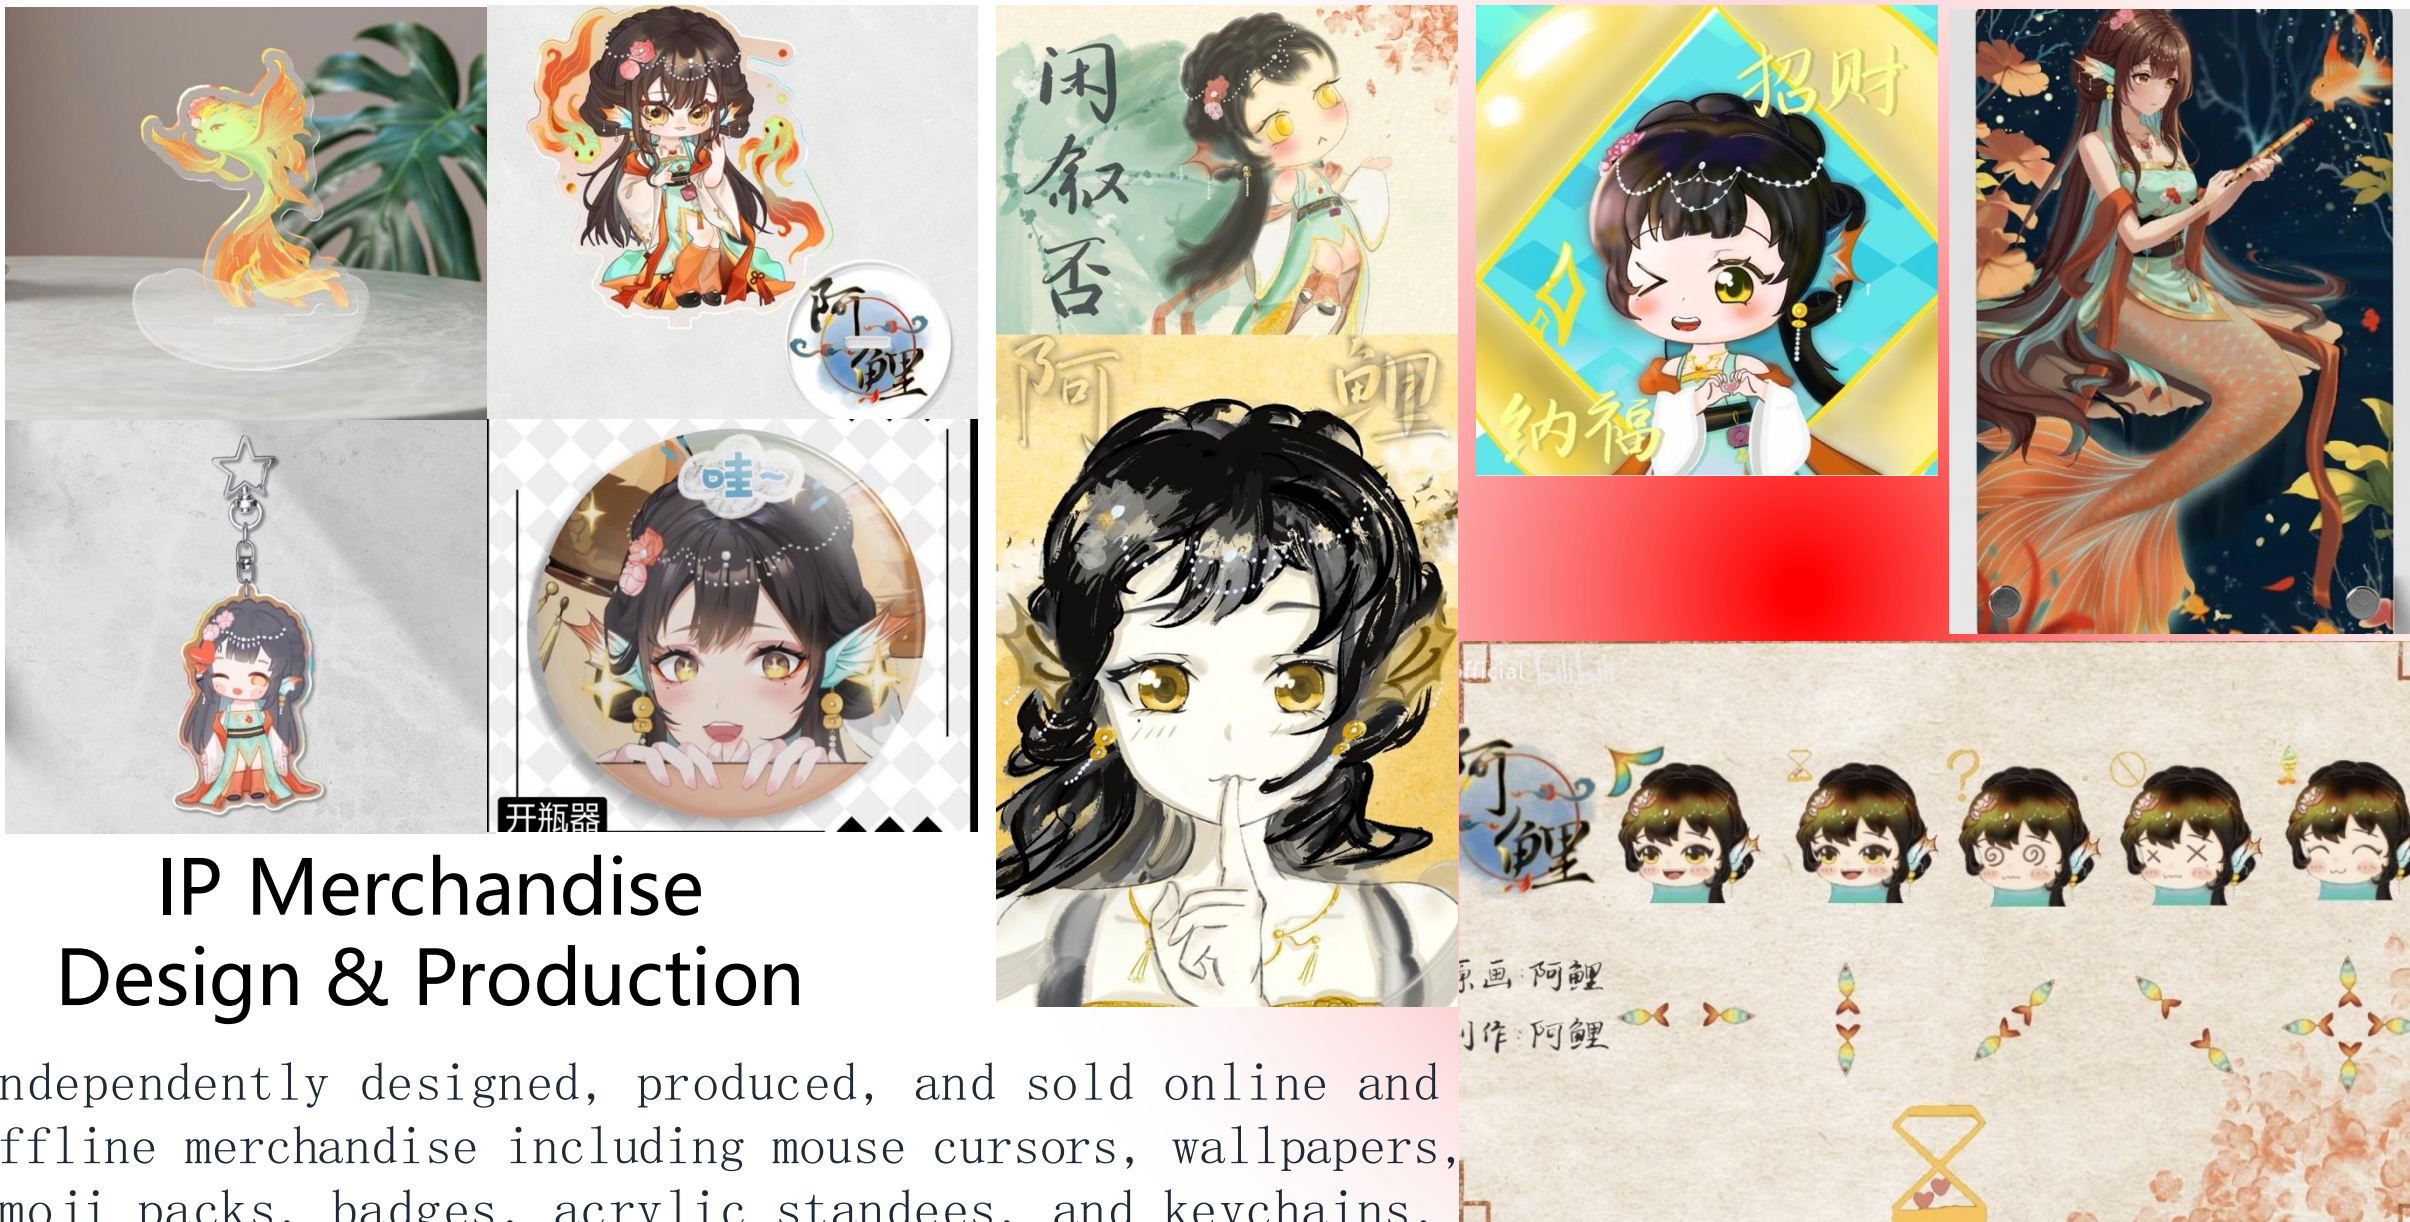

- Independently built a Linktree aggregation page for overseas social media operations, creating a unified hub for brand entry points, content navigation, and user conversion paths.
- Project value: Improved link management efficiency across multi-platform content distribution and provided a unified destination for social traffic conversion and user acquisition.

Brand Graphic Design Case: Personal IP "Ali (Little Koi) Official"

Laura Luo ———— 2023.7-2023.10

- Independently completed the full incubation process for the virtual streamer "Ali Official," including character setup, visual identity, livestream content design, operations review, and merchandise design, using VTube Studio, VBridger, OBS, and other tools for character presentation and content production.
- Results: Reached 7,000+ followers on Bilibili within 3 months, with 219,000 cumulative views.

IP Merchandise Design & Production

Independently designed, produced, and sold online and offline merchandise including mouse cursors, wallpapers, emoji packs, badges, acrylic standees, and keychains, building a complete supply chain with manufacturers.

IP Merchandise Production

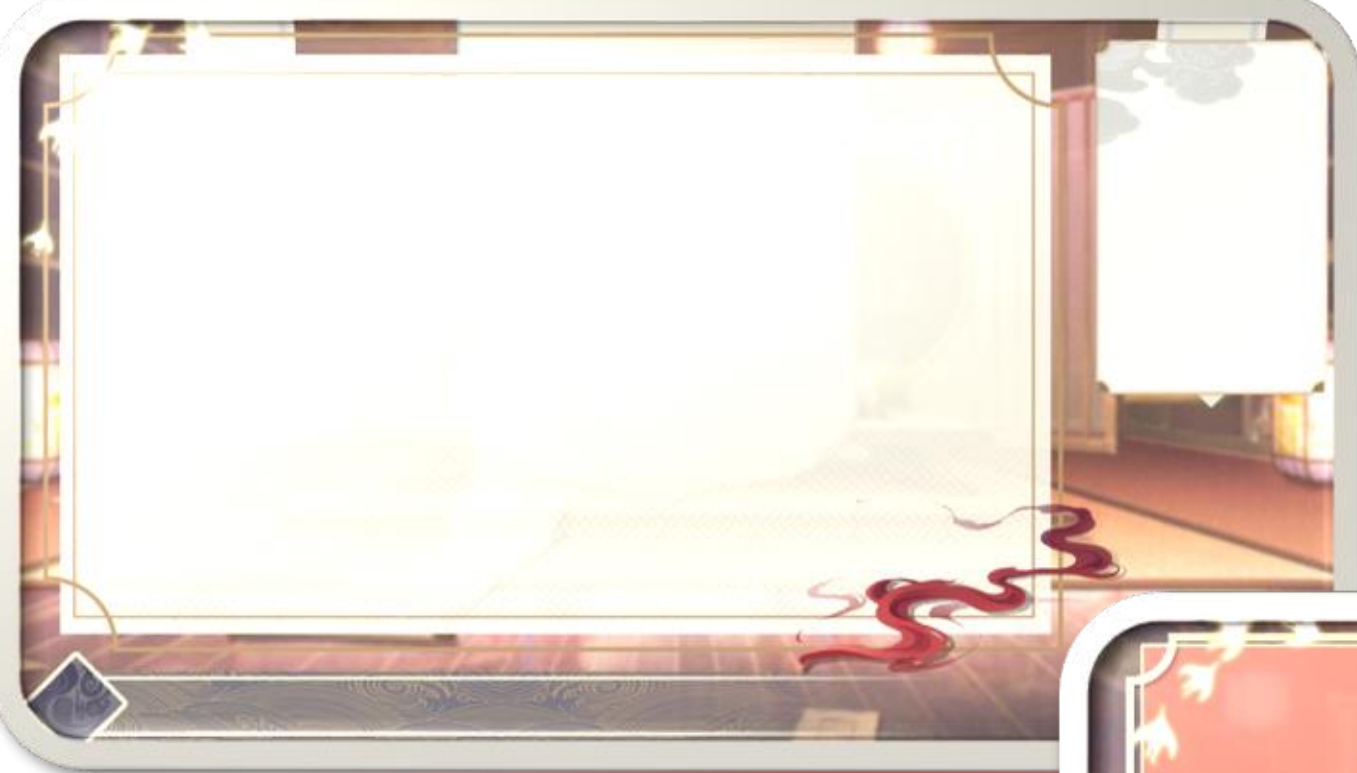

Drawing inspiration from the intangible cultural heritage artefacts of China's Tujia ethnic minority, we designed a new Tujia-style outfit for A Li, which was then translated into concept art and a Live2D animated model.

Part3 Content Plan&Example-Pinduoduo

Part4 Measurement Plan

As our content strategy focuses on **conversion** through **keyword optimization**, **social-driven group purchases**, and **UGC amplification**, we will track these metrics to directly reflect the **outcomes** of strategy and its alignment with **Pinduoduo's discovery and recommendation logic**.

Key metrics:
Page Dwell Time (The average time a user spends on the product detail page)

Formula:
$$\text{Average Dwell Time} = \frac{\sum \text{Time spent by all users}}{\text{Total number of visits}}$$

★ Longer dwell time signals that the content is engaging and informative, which improves ranking in Pinduoduo's internal recommendation engine.

CTR
Formula:
$$\text{CTR} = \frac{\text{Number of Clicks}}{\text{Number of Impressions}} \times 100\%$$

★ High CTR means the title, image, and tags are compelling, a key signal for Pinduoduo's search and feed algorithms.

Group Purchase Rate (The proportion of users who initiate or join a group purchase after viewing the product)

Formula:
$$\text{Group Purchase Rate} = \frac{\text{Group Purchase Orders}}{\text{Total Product Page Views}} \times 100\%$$

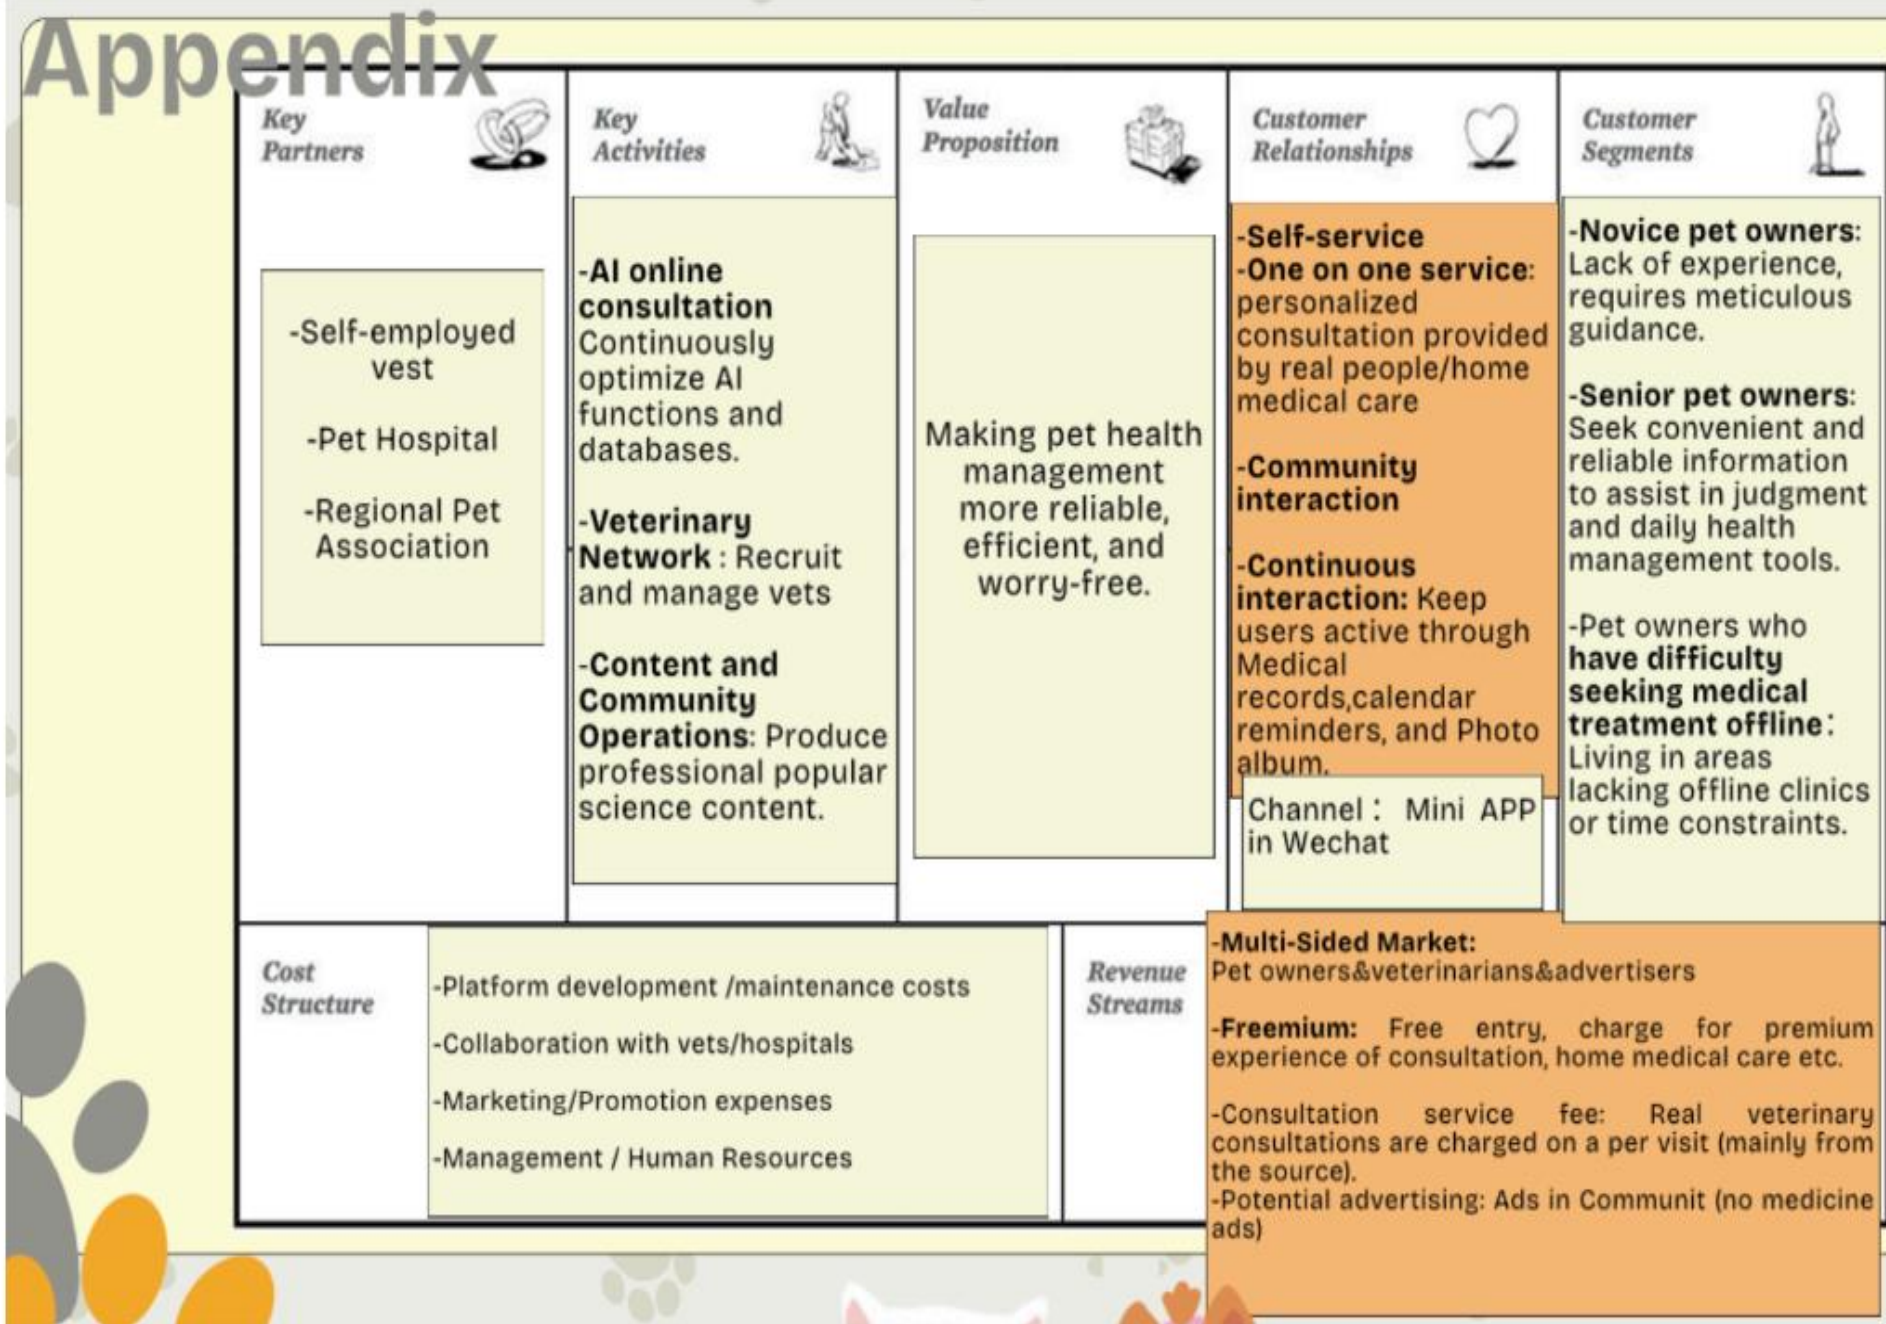

★ This reflects how well your content motivates users to take action and invite others—key to Pinduoduo's viral growth.

Other Supporting Metrics:
User-Generated Reviews/Bounce Rate/Repeat Visit Rate
